Description

HVCH is an integral part of NIE Networks' fault and emergency response processes and systems. It plays a fundamental role in call handling operations, both during normal call volumes and periods of high demand. The HVCH hosted system provides 100% speech recognition, enabling customers to be identified by postcode and house number when their telephone number is not matched within the NIE Networks' database. Using HVCH ensures callers reporting a fault never receive an engaged tone, as the call is either handled by a Customer Service Agent (CSA), or the automated HVCH system. Additionally, HVCH provides customers with the option to report a fault online.

Procedure

Procedure type

Direct award

Special regime

Utilities

Direct award justification

Extreme and unavoidable urgency

The justification for this STA is reliance upon Clause 41 "Direct Award in Special Cases" of the Procurement Act 2023, Schedule 5. Where the goods to be supplied are strictly necessary for reasons of extreme and unavoidable urgency, and as a result the contract cannot be awarded on the basis of a competitive tendering procedure. The urgency is unavoidable as it is not attributable to any act or omission of NIE Networks and could not have been foreseen by NIE Networks.
