Scope

Description

Overview

Rossendale Borough Council requires a construction company to refurbish vacant shop unit 8, Trickett's Arcade, Waterfoot, into a flexible community hub. The contractor must

preferably have experience in heritage projects due to the Grade II listed status of this Victorian building located within the proposed Waterfoot Conservation Area.

Background & Context

This project forms part of UK Shared Prosperity Fund (UKSPF) regeneration initiatives aimed at revitalising Waterfoot, a former industrial hub now developing a reputation for creativity and community engagement. Trickett's Arcade (Victoria Arcade) is a historically significant mixed-use building requiring investment to restore its role as a community asset.

Required Works & Services

The contractor must supply all labor, materials, equipment, and expertise to deliver the following scope:

Ground Floor Works:

Install a fully DDA-compliant WC facility including all plumbing, electrical connections, ventilation, fixtures, and fittings.

Install a compact kitchenette with sink, worktop, storage units, electrical supply for appliances, and appropriate ventilation.

Replace existing external door on like-for-like basis, maintaining heritage character while ensuring security and weatherproofing

Prepare and paint existing external shopfront using appropriate heritage-compatible materials and colors.

Lower Ground Floor:

Complete the unfinished WC installation left by previous tenants, including all necessary plumbing, electrical work, and finishing.

General Improvements:

Assess and improve walls, floors, and ceilings throughout the unit including preparation, repairs, insulation where appropriate, and decorative finishes suitable for community use.

Install additional lighting throughout the unit with energy-efficient fittings, ensuring adequate illumination for exhibitions and community activities.

Design and install temporary panelling system along the affected wall to screen water

ingress areas from public view, incorporating removable sections for ongoing inspection and monitoring of damp, ingress, and mould conditions.

Special Requirements:

Address water ingress along one wall caused by roof issues above - contractor must assess the situation, recommend temporary solutions, and implement measures to protect the refurbished space until permanent roof repairs are completed by others.

All work must respect the heritage character of the Grade II listed building and comply with conservation requirements.

Ensure all installations meet current building regulations, DDA compliance, and health & safety standards.

Coordinate with ongoing efforts between the Council and property owner regarding permanent roof repairs.

Delivery Requirements:

All work conditional upon formal lease agreement execution between Rossendale Borough Council and building owner

Contractor attendance required at open day viewing on Thursday 2nd October 2025 for site assessment and measurements (contact LeahNewton@rossendalebc.gov.uk to book slot).

Provide detailed cost breakdown and methodology for addressing water ingress as part of tender submission.

Submit comprehensive project timeline showing critical milestones.

Evidence of heritage project experience and relevant certifications.

Comply with all supporting documentation requirements outlined in Appendix A.

Supply Method:

Single fixed-price contract for complete refurbishment works including design, supply of all materials, installation, testing, and handover of fully functional community hub ready for immediate occupation and community use.

The successful contractor will transform this vacant heritage unit into a vibrant community space showcasing local creativity and hosting diverse activities from exhibitions to social

groups, contributing to Waterfoot's cultural regeneration.
