II.2.4) Description of the procurement at the time of conclusion of the contract:

The Energy Trading and Risk Management system (ETRM) was used by Trading and Risk to

manage the CCS energy portfolio for more than 1,200 customers across the Public Sector

with a total spend of more than £1.5 billion per annum. The Energy Trading and Risk Management system (ETRM) was used to record trade and demand forecasts, calculate open positions and valuations based on market prices, and serves as Trading and Risk's 'single source of truth' for portfolio reporting and information. CCS was seeking to replace its current ETRM by sourcing a replacement, cloud based system. This was an off-the-shelf

ready to deploy software procurement, rather than a software development project. The ETRM would support CCS's ability to provide its customers with risk managed products for

power and gas.
