Contract

## **963400862 T1390 Making the case for network acceptance of simplified signalling connections for new low volume freight terminals**

RSSB

UK7: Contract details notice - Procurement Act 2023 - [view information about notice types](#)

Notice identifier: 2025/S 000-059407

Procurement identifier (OCID): ocds-h6vhtk-055b52 ([view related notices](#))

Published 24 September 2025, 4:05pm

### **Scope**

### **Description**

This project will develop and validate a new ground frame signalling facility to support freight operations at sites where full signalling integration is not viable. The work includes producing a technical specification for the solution, supporting system approval through the Network Rail Future CCS Approval Panel, and identifying pilot opportunities for first-of-a-kind implementation. The project aims to reduce costs and complexity for freight site access while maintaining safety and operational standards.
