Description

About the Office for National Statistics (ONS)

ONS is the UK's largest independent producer of official statistics and is the National Statistical Institute for the UK. Formally, it is the executive office of the UK Statistics Authority, a non-Ministerial Department established by the Statistics and Registration Service Act 2007. It is responsible for collecting and publishing statistics related to the economy, population, and society at national, regional, and local levels. ONS plays a leading role in national and international good practice in the production of official statistics.

Introduction

Prices Division is responsible for the production and quality assurance of two of the Office

for National Statistics (ONS) most high profile statistics, the Consumer Prices Index including owner occupiers' housing costs (CPIH), and the Consumer Prices Index (CPI). The consumer price indices are used widely by, among others, Her Majesty's Treasury for monitoring financial policy, the Department of Work and Pensions for setting social security benefits, the Bank of England for monetary policy decisions, financial institutions for analysis, Trade Unions for wage bargaining and the wider public for a 'sense' of inflation.

Core Requirements

To compile the consumer price indices, information is required on the annual expenditure on of different groups of products at multiple and independent stores. This enables the ONS to give each type of shop and product its correct weight or market share in the list of goods and services used to produce the indices. Much of the information is sourced from internal ONS surveys but some additional detailed expenditure information is needed. The consumer price indices are compiled by weighting together product or item level price data in a way that reflects UK consumer spending patterns. To achieve this, detailed consumer spending figures are required at a suitably disaggregated level for lower-level item weights to be constructed without the need for arbitrary decisions.

Below is a list of headings against which detailed consumer expenditure and market share information is required.
