Scope

Reference

T1397 The role of data-driven tools to support the development and management of driver competence p

Description

This research aims to:

- collate knowledge on the current state of driver competence management (assessment and developmental)
- identify opportunities to use technology and data more effectively, and
- clarify what changes are needed to take advantage of these opportunities.

Ultimately, it will support industry in understanding the role of data and technology in

developing a risk-based, data-driven, competence management system. A key aspect of this work will be to ensure that any proposed recommendations and conclusions are practical and how these could be implemented across industry.

The research will be separated into two distinct phases:
