PROC.08.0739

Description

University Hospital Birmingham NHS Foundation Trust (UHB) is now one of the largest teaching hospital trusts in England treating more than 2.2 million patients each year from a regional, national, and international population. Further information can be obtained from <https://www.uhb.nhs.uk/>

The Trust is made up of the following;

- Queen Elizabeth Hospital Birmingham (QEHB)
- Birmingham Heartlands Hospital

- Good Hope Hospital
- Solihull Hospital
- Solihull Community Services
- Birmingham Chest Clinic
- Along with a number of satellite units, allowing patients to be treated closer to home

Birmingham and Solihull ICB (BSol ICB) serves a registered population of over 1.6 million people, supported by multiple NHS secondary care and community trusts and 176 GP Practices/Practice Groups.

Currently, patient pathways across primary, community and secondary care are fragmented, with multiple manual processes for referrals, results handling, and patient communication. This creates inefficiencies, clinical variation, and a lack of patient visibility, all of which contribute to poorer outcomes and health inequalities.

To address this, UHB intends to procure a single, integrated digital pathway platform to:

- Deliver evidence-based care consistently across specialities.
- Improve efficiency and reduce the risk of error and unwarranted variation delivering care to the patient in the most appropriate setting, first time.
- Facilitate patient choice and engagement, ensuring referrals are directed to the right clinic at the right time.
- Improve quality of care, reduce health inequalities, and give patients visibility and involvement throughout their journey.

Total value (estimated)

- £1,666,666.67 excluding VAT
- £2,000,000 including VAT

Above the relevant threshold

Contract dates (estimated)

- 23 January 2026 to 22 January 2030
- Possible extension to 22 January 2036
- 10 years
