## Changes to notice

This notice has been edited. The <u>previous version</u> is still available.

Change to extend return date to 1 December 2025

#### Scope

#### Reference

DN776216

#### **Description**

The Authority has been awarded £1.625m LEVI funding from the Office of Zero Emission Vehicles (OZEV) through the Local Electric Vehicle Infrastructure (LEVI) fund. Based on that funding the Authority is now seeking to award a single concession contract for a supplier to install and operate an affordable and easy to use, reliable and widely accessible and recognisable Electric Vehicle (EV) charge point network across the Isle of Wight (the 'Contract') The form of contract has been developed in alignment with the LEVI Heads of Terms. The Authority will be looking for a Supplier who can demonstrate a commitment to maximising the use of the LEVI funding and deliver an ambitious project with a full solution offering end to end services. It would be the intention that the successful supplier would invest its own resources, to be used in conjunction with the LEVI funding, to significantly increase the number of public chargepoints available on the public highway network across the island. The project will involve the deployment of local, primarily low powered on street charging infrastructure which must focus on locations that serve residential communities and those residents that do not have access to off road car parking. The Supplier will be required to deliver all aspects of the goods, services and works needed for the Project, which will include purchasing relevant Electric Vehicle Charging Infrastructure (EVCI), connecting it to the grid and maintaining, upgrading and managing the operation of the chargepoint network across a 15-year term. Full details can be found in the accompanying Tender Pack

#### **Total value (estimated)**

- £34,000,000 excluding VAT
- £40,800,000 including VAT

Above the relevant threshold

#### **Contract dates (estimated)**

- 13 March 2026 to 12 March 2040
- 14 years
