Description

To attract new funding WRAP needs to urgently reposition itself owing to a change in the socio-political context around the environment and climate change. WRAP needs to offer economic and social benefits as well as environmental ones. We need to do this before COP in mid-November. This one-off piece of work needs specialist insight into C-level corporate and ministerial government priorities and mindset, combined with specialist expertise in sustainability and circularity. This combination is usually unaffordable to WRAP but exceptionally, owing to a merger, a freelance option is temporarily available.
