Reference

DLSITT1076

Description

Located on the Harwell Science and Innovation Campus in Oxfordshire, Diamond Light Source (DLS) is a leading-edge facility for science, engineering and innovation. Diamond allows researchers from academia and industry to investigate the structure and behaviour of the world around us at the atomic and molecular level.

To continue delivering the world-changing science that Diamond enables, the facility is being upgraded to Diamond-II, a co-ordinated programme of development that combines a major machine upgrade with new instruments and complementary improvements to optics, detectors, sample environment and delivery capabilities, and computing, as well as integrated and correlative methods. This will be transformative in speed and spatial resolution and will offer users streamlined access to enhanced instruments for life and physical sciences.

The scope of this contract is to manufacture a number of pre-series and production PEBPM bellows assemblies for the assembly into the Diamond-II storage ring. This will require several development activities, such as design, manufacturing trials, manufacture, welding, inspection, testing and delivery to DLS. Installation at DLS by the supplier is not required.

Further details can be found in the specification.

Total value (estimated)

- £900,000 excluding VAT
- £1,080,000 including VAT

Above the relevant threshold

Contract dates (estimated)

- 8 December 2025 to 9 August 2027
- 1 year, 8 months, 2 days

Main procurement category

Goods

CPV classifications

- 38341100 - Electron-beam recorders

Contract locations

- UKJ14 - Oxfordshire

Participation

Particular suitability

Small and medium-sized enterprises (SME)

Submission

Tender submission deadline

6 November 2025, 12:00pm

Submission address and any special instructions
