Description

Lancashire Renewables Ltd (LRL) is a company owned wholly by Lancashire Country Council and Blackpool Council. LRL operates two waste treatment facilities in Leyland and Thornton. Each site is approximately 40 acres and contains numerous buildings responsible for the receipt and processing of household and residual waste (circa 400,000 tonnes p.a.). Waste is either transported into the offtake market for further processing/ recycling or to landfill when necessary.

LRL's key objectives are to receive, treat and transport contract waste in accordance with the targets and service requirements set out in the Service Level Agreement between LRL and Lancashire County Council.

As part of its day-to-day operations, the company uses a Bollegraaf HBC80 automatic baler to compress waste material into blocks (bales) which are then secured by steel

baling wire. The bales are subsequently transported on pallets by road to be further processed, such as metals, card, paper and plastics that will be recycled.

Lancashire Renewables orders approximately 100 tonnes of baling wire per annum for the above purpose. Deliveries are made on returnable formers, with each former containing approximately 750kg of wire. The wire supplier must take away any empty formers at the point of each delivery in an exchange manner. Typical delivery volume is 24 tonnes of wire. There is currently one delivery location based at PR26 6TB.

The baling wire is subject to strict tolerances as set out in the tender specification for baling wire

Commercial tool

Establishes an open framework

A series of frameworks with substantially the same terms. Awarded suppliers are carried over and new suppliers can bid.

Framework

Open framework scheme end date (estimated)

5 October 2033

Maximum percentage fee charged to suppliers

0%

Framework operation description

The Award process will be via Mini-Competition that was detailed in ITT documents.

Award method when using the framework

With competition

Contracting authorities that may use the framework

Establishing party only

Contract 1. Supply of baling wire

Suppliers (2)

- BARNFATHER WIRE (MIDLANDS) LIMITED
- LEVER ENGINEERING SUPPLIES LTD

Contract value

- £1,666,667 excluding VAT
- £2,000,000 including VAT

Above the relevant threshold

Date signed

2 October 2025

Contract dates

- 6 October 2025 to 5 October 2028
- Possible extension to 5 October 2033
- 8 years

Description of possible extension:

The Open Framework will commence on 06/10/2025, with expiration at midnight on 05/10/2028, unless it is otherwise terminated in accordance with the Framework or otherwise lawfully terminated.

For the avoidance of doubt the Framework must always expire before the award of the next framework and there must be an award of a framework at least once during:

- the period of three years beginning with the date of award of the first Framework in the scheme, and;
- each period of five years beginning with the day of the award of the second framework in the scheme.

The final framework will expire no later than the end of the period of 8 years beginning with the day on which the Framework under the Scheme is awarded.

Assuming that the contract commences on 06/10/2025, this means that the final framework will expire on 05/10/2033.

Please note that the total awarded value inclusive of VAT represents the maximum spend under the entire series of frameworks within this open framework.
