WS2024348128

Description

The Gangway and Inter-Car Barriers of the London Underground S Stock (Circle, District, Hammersmith & City and Metropolitan lines) fleet of trains are overdue for replacement / overhaul according to the Vehicle Management System.

An engineering assessment has been undertaken to evaluate the current condition of the Gangways and Inter-Car Barriers. A specification report has been produced as a result and we are progressing this for early market engagement for better understanding of market interest, capacity and input to help shape appropriate commercial and technical strategy for deploying the project.

On conclusion of market engagement, the overhaul solution based on the specification, is

intended to be progressed to tender with the objective of implementing it on all of London Underground's 192 S Stock fleet of trains
