Value excluding VAT: £300,002.94

II.2) Description

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

II.2.4) Description of the procurement

The Cleft Registry and Audit Network (CRANE) Database collects information on all children born with a cleft lip and / or palate (including those with non-cleft velo-pharyngeal insufficiency) in England, Wales and Northern Ireland.

The CRANE Database has two aims:

- To register birth, demographic and epidemiological data related to all children born in England, Wales and Northern Ireland with the congenital abnormality of clefting of the lip

and / or palate.

- To record the treatment of children and adults with clefts of the lip and / or palate and the outcome of such treatment. This data will provide the basis for the national audit of cleft care.

In line with these broad aims, the CRANE Database has the following objectives:

- To provide an up-to-date register of all cleft patients.
- To monitor frequency and incidence of clefting.
- To audit and report on quality of care for patients with clefts and thus promoting high standards in clinical management.
- To trial and introduce (with CDG oversight and consent) an outlier policy for the registration and audit outcome reporting functions of CRANE.
- To support research and focused quality improvement studies.
- To work with and receive advice from the Craniofacial Society and its members to improve the delivery of cleft care.
- To send data to NHS England SSQD for Quality Dashboard production on Quarterly basis.

In addition, the CRANE Database endeavors to strengthen its links with other congenital abnormalities and cleft registries and databases in other countries.

II.2.5) Award criteria

Price

II.2.11) Information about options

Options: No
