### **Description**

Tenders are invited to carry out a review of laboratory testing methods which should:

- 1. Build on previously published research and complement the work and learning of the FSA on CCPs.
- 2. Identify and evaluate potential analytical methods for the detection, identification and quantification of CCPs.
- Consider the traceability of current and emerging CCPs, and differentiation from other proteins using analytical methods e.g. genomic or proteomic approaches
- Consider emerging analytical methods and technologies

- Consider the requirements for associated tools e.g. databases, reference materials
- 3. Identify knowledge gaps and discuss limitations and challenges relating to the analytical methods identified, including practicality and cost.
- 4. Offer recommendations on analytical methods to inform the evidence base.
