Scope

Description

The Utility is seeking to engage suppliers to support PFAS catchment investigations as part of its AMP8 programme. The services will focus on two Tier 2 surface water catchments and include:

Desk-based review of water quality and catchment risk data

Targeted PFAS sampling in surface water, sediment, and wastewater

Flow monitoring and integration with water quality data

Forensic analysis and fingerprinting of PFAS sources

Mass balance modelling and conceptual catchment understanding

Evaluation of mitigation options including feasibility, cost-effectiveness, and sustainability

Stakeholder engagement planning and support

Provision of spatial data for GIS-based Catchment Risk Assessment

The aim is to identify PFAS sources, understand concentration variability, and assess mitigation strategies to reduce reliance on energy-intensive treatment methods.
