Description

The Methodology Development & Review of PFAS & POP's in Landfill Overarching Project - WP2 - Landfill Gas Sampling Methodology development (PFAS)

Persistent Organic Pollutants (POPs) and specifically Per and Polyfluoroalkyl Substances (PFAS) are one of the highest priority chemical pollutants globally. Several PFAS compounds have recently shown through new evidence that they are more toxic than first thought.

This project is part of an ongoing series of work investigating the potential presence of PFAS and POPs in landfills, and their impact on landfill emissions and receptor.

This overall project will deliver four interrelated work packages, of which this contract and

STA will be for work package 2. This whole project will build upon earlier findings and continue the investigation of PFAS and POPs in landfill emissions.

The EA needs to better control PFAS and POPs from landfills by introducing new environmental permit con
