Scope

Reference

P/REF 447

Description

Historic England is working to develop a decision-making framework and digital toolkit to help those who manage heritage assets prepare for and manage climate change driven impacts, including partial or complete loss. Our approach is based on adaptive pathway planning over the long term – what we are calling a long-term contingency approach.

This project will provide expertise to help us develop a training module on the long-term contingency planning approach for owners, managers and local authorities.
