PRC096

Description

This procurement is taking place under WRAP's Internal Framework FRA080: Materials Systems Transformation.

Phase one of the Workplace Recycling Law came into force on 6 April 2024 in Wales, with phase 2 due to come into force in April 2026. Welsh Government is now seeking to understand the impacts of adding further materials to the list of those to be presented separately for collection and recycling.

Welsh Government wishes to assess the impact of the proposed phase 3 of the Regulations which includes the impact of separating plastic film and textiles.

The original RIA was conducted in 2019 (commissioned by WG) and was then revised and published in 2023 in readiness for introduction of phase 1 of the Workplace Recycling Regs. A further RIA was carried out in July 2025 for the inclusion of sWEEE (phase 2).

The policy decision to add plastic film to the list of materials to be presented separately for collection and recycling was made on the basis of the 4 nations Government Response to the 2021 pEPR consultation published 26 March 2022 (EPR Consultation Government response template) and accompanying Impact Assessment which included consideration of the plastic film requirement and is available here: [Impact Assessment](#).

The successful bidder will need to carry out an RIA assessing the inclusion of plastic film and textiles. The baseline for this analysis should include phases 1 and 2 of the Workplace Recycling Regs.

The Welsh Government wishes to understand the impact of each of the proposed additions (i.e. plastic film and textiles) to the specified material streams to be separately collected.
