Scope

Reference

C10892

Description

The Services which make up Oxfordshire substance use treatment system are commissioned by Oxfordshire County Council Public Health Team. These include the Community Alcohol and Drug Service and the Children and Young Peoples Service. Collectively they support over 3,450 individuals who engaged in structured treatment for illicit drugs and/or alcohol use, or non-structured tier 2 treatment. Data relating to each of these individuals, which complies with the national core data set, must be entered into a system by Authorised Users. This data is currently entered onto centralised web-based system, locally entitled Oxfordshire Treatment Information System (OTIS).

The objective for the System requirement is:

- Provision of a fully relational business specific management information system capable

of delivering a 'single system' solution for most aspects of service delivery pertaining to individuals engaging with Council commissioned service providers in the Oxfordshire drug and alcohol treatment services.

- A system which can 'interact with' relevant existing Council systems and Council commissioned service systems to draw down and also submit specified data (see Specification Supplement A).

- A system which can provide core data to National Drug Treatment Monitoring System (NDTMS)

The contract period is 30 months, commencing on 1 April 2026. There are no options to extend the contract period.
