**I.4) Type of the contracting authority**

Body governed by public law

**I.5) Main activity**

Health

---

## **Section II: Object**

### **II.1) Scope of the procurement**

#### **II.1.1) Title**

V002 Maintenance of Fire Alarm system

#### **II.1.2) Main CPV code**

- 51700000 - Installation services of fire protection equipment

#### **II.1.3) Type of contract**

Services

#### **II.1.4) Short description**

The fire detection system is currently maintained and serviced by ADT.

Due to the complexity and size of the project the service provider would be able to manage, mobilize and schedule these works within the required timescales.

Much of the existing fire alarm system has been installed by ADT and that would ensure that the site wide fire system was fully standardised by ADT.

ADT provide maintenance and support for fire systems and have support covering reactive and planned maintenance of the fire system within the site where the technician has extensive knowledge of the systems. Due to the size and nature of the fire alarm system ADT are thought to be the only service provider who could provide the installation.

The reason this requirement has been published as a VEAT in addition to above is that ADT are thought to be the only company that can access the current closed protocol panels and upload them to the new open protocol panels.

#### **II.1.6) Information about lots**

This contract is divided into lots: No

#### **II.1.7) Total value of the procurement (excluding VAT)**

Value excluding VAT: £59,160

### **II.2) Description**

### **II.2.3) Place of performance**

NUTS codes

- UKM81 - East Dunbartonshire, West Dunbartonshire and Helensburgh & Lomond

Main site or place of performance

NHS Golden Jubilee Hospital

### **II.2.4) Description of the procurement**

The fire detection system is currently maintained and serviced by ADT.

Due to the complexity and size of the project the service provider would be able to manage, mobilize and schedule these works within the required timescales.

Much of the existing fire alarm system has been installed by ADT and that would ensure that the site wide fire system was fully standardised by ADT.

ADT provide maintenance and support for fire systems and have support covering reactive and planned maintenance of the fire system within the site where the technician has extensive knowledge of the systems. Due to the size and nature of the fire alarm system ADT are thought to be the only service provider who could provide the installation.

The reason this requirement has been published as a VEAT in addition to above is that ADT are thought to be the only company that can access the current closed protocol panels and upload them to the new open protocol panels.

### **II.2.11) Information about options**

Options: No

### **II.2.13) Information about European Union Funds**

The procurement is related to a project and/or programme financed by European Union funds: No

---

## **Section IV. Procedure**

### **IV.1) Description**

#### **IV.1.1) Type of procedure**

Award of a contract without prior publication of a call for competition in the cases listed below

- The procurement falls outside the scope of application of the regulations

Explanation:

The fire detection system is currently maintained and serviced by ADT.

Due to the complexity and size of the project the service provider would be able to manage, mobilize and schedule these works within the required timescales.

Much of the existing fire alarm system has been installed by ADT and that would ensure that the site wide fire system was fully standardised by ADT.

ADT provide maintenance and support for fire systems and have support covering reactive and planned maintenance of the fire system within the site where the technician has extensive knowledge of the systems. Due to the size and nature of the fire alarm system ADT are thought to be the only service provider who could provide the installation.

The reason this requirement has been published as a VEAT in addition to above is that ADT are thought to be the only company that can access the current closed protocol panels and upload them to the new open protocol panels.
