CPV classifications

- 72222300 - Information technology services

Contract locations

- UK - United Kingdom

Other information

Conflicts assessment prepared/revised

Yes

Procedure

Procedure type

Direct award

Direct award justification

- Single supplier - technical reasons
- Additional or repeat goods, services or works - extension or partial replacement

Single supplier - although other suppliers exist, there is an incompatibility between the existing systems and those of any new supplier, which would result in time-consuming and complex migration of the services. This would result in significant cost, delay and disruption to an important service, and would be unacceptable for practical, efficiency and

financial reasons.

Additional/repeat services - the Authority is proposing to buy additional or repeat services which are operationally compatible with existing provisions. A change of supplier would result in the Authority receiving services which are incompatible with existing services, and that incompatibility would result in disproportionate technical difficulties in the operation and maintenance of the services. It would result in disruption to services, fundamental changes to services, training/rewriting of documentation and procedures, and duplication of effort.

The delay caused by a new procurement would prevent the Authority from moving to the lower cost platform and realizing savings. There would also be a cost of moving to a new supplier, and for the overlapping provision of services.

In addition, there has been a benchmarking process carried out indicating that a contract with the current supplier provides value for money.

In these circumstances, it is considered that a direct award justification applies, and that an exemption to the requirement to undertake a competitive tendering procedure is justified.

Supplier

IOMART MANAGED SERVICES LIMITED

- Companies House: SC275629
