Angiography, Hybrid Theatres, Capital Equipment, Related Accessories and Services

SUPPLY CHAIN COORDINATION LIMITED

UK6: Contract award notice - Procurement Act 2023 - [view information about notice types](#)

Notice identifier: 2025/S 000-077456

Procurement identifier (OCID): ocds-h6vhtk-051ea6 ([view related notices](#))

Published 26 November 2025, 7:34pm

Changes to notice

This notice has been edited. The [previous version](#) is still available.

Scope

Reference

Project_1629

Description

The purpose of this notice is to draw attention to a procurement the Authority intends to establish a National Framework Agreement for the provision of advanced Angiography diagnostic equipment, related accessories and services, including but not limited to Imaging Systems, Catheterisation Laboratory Tools, and Specialised Diagnostic Software under the following structure:

- Lot 1: Angiography Equipment, Accessories & Services
- Lot 2: Managed Services related to Angiography Equipment & Accessories
- Lot 3: Mobile and Relocatable Catheterisation Laboratories
- Lot 4: Wearable Radiation Protection Products

Commercial tool

Establishes a framework

Lot 1. Angiography Equipment, Accessories and Services

Description

Lot 1 covers the supply of advanced Angiography Equipment and associated accessories, targeting a comprehensive range of diagnostic and interventional imaging needs. Products required include Fixed and Mobile Angiography Systems designed for high-resolution vascular imaging, suitable for both routine diagnostics and complex interventional procedures. The range includes:

- Fixed C-arm Systems: Floor- and ceiling-mounted angiography systems for comprehensive vascular imaging in hospital-based catheterization labs.
- Mobile C-arm Systems: High-mobility units to support flexible imaging needs, especially in multi-use settings.
- Hybrid Imaging Equipment: Systems

capable of integrating with CT, MRI, and other imaging modalities to enable multi-disciplinary procedures. • Essential Accessories: A full selection of accessory items, such as monitoring systems, specialized tables, and radiation shielding, are also included to ensure functionality across diagnostic and interventional applications.

Lot 2. Managed Services (related to Angiography Equipment & Accessories)

Description

The provision of managed services relating to Lot 1 Angiography Equipment, Related Accessories and Services. Through a comprehensive Managed Services (MS) for Angiography and related imaging equipment. Key services include: - Equipment Planning and Procurement: Assisting healthcare providers in assessing, selecting, and procuring equipment tailored to specific diagnostic and interventional needs. - Installation and Commissioning: Coordinating the delivery, installation, and setup of equipment in compliance with regulatory and safety standards. Ongoing Maintenance and Technical Support: • Providing preventive and corrective maintenance, including 24/7 support, to minimize downtime and ensure equipment reliability. • Performance Monitoring and Reporting: Implementing real-time performance monitoring with regular reports on equipment usage, availability, and condition. • Upgrade and Replacement Services: Ensuring equipment remains at the cutting edge by managing timely upgrades, refurbishments, and end-of-life replacements. • Training and Development Programs: Offering on-site training and educational resources to support healthcare professionals in maximizing equipment utility and performance.

Lot 3. Mobile and Relocatable Catheterisation Laboratories

Description

Lot 3 encompasses the provision of fully equipped Mobile and Relocatable Catheterization Laboratories designed to deliver high-quality, flexible cardiac and vascular diagnostic services in various healthcare settings. Suppliers are expected to provide catheterisation laboratories that meet the clinical, technical, and operational needs of healthcare providers. Key components and services include: • Fully Equipped Cath Labs: Mobile and relocatable units outfitted with high-definition imaging equipment, such as C-

arm angiography systems, digital imaging workstations, and real-time monitoring capabilities. • Installation: Services to facilitate the setup, and commissioning of mobile catheterisation laboratories in desired location. • Modular Design Options: Layout configurations that can adapt to specific requirements, including space for specialized equipment and staff movement. • Environmental Control and Safety Compliance: Ensuring units are climate-controlled, radiation-shielded, and meet all necessary health, safety, and regulatory standards. • Operational Support and Training: On-site or virtual training for healthcare staff to ensure safe and efficient use of the facilities and equipment.

Lot 4. Wearable Radiation Protection Products

Description

The provision of commonly used radiation personal protective equipment (PPE) these wearable products are designed to provide protection against both primary and scattered radiation. For the avoidance of doubt, all regulatory and internationally recognised standards for wearable radiation protection products must be fully met, these may include but are not limited to: This range typically consist of:- Radiation protective clothing may consist of Lead, Lead composite, Lead free, and Lead equivalent materials- An outer lining of rubber-coated polymer/polyurethane fabric strong, flexible and washable or similar.- Should have a water-resistant outer covering- Lining to be woven nylon or other suitable material- May be available in a variety of colours, designs and sizes including bespoke sizing (Where applicable)- Adjustable features to maximise comfort and support for the wearer Examples of commonly used personal protective equipment (PPE) for radiation protection may be used in the following clinical indication - Angiography, cardiology, urography, haemodynamic, fine surgery, Urology, oncological centre, orthopaedic surgery, pace-maker positioning and general surgery. Plus, wearable radiation protection product storage solutions and/or radiation protection product management solutions to ensure these protective products provide the required levels of protection.

Contract 1. Angiography and Hybrid Capital Equipment and Services 2025
