Scope

Reference

NE011225SSM

Description

This project is to analyse soil samples collected from a range of sites and time points by Natural England's Long Term Monitoring Network using metabarcoding. The project will deliver raw and taxonomically assigned data on bacteria and fungi within the samples, along with meta-data and reporting sufficient to ensure analyses are fully repeatable. As the soil samples originate from a longer term monitoring programme this project should aim to produce data comparable with previous metabarcoding analyses, as detailed in the specification.

Total value (estimated)

- £49,500 excluding VAT
- £59,400 including VAT

Below the relevant threshold

Contract dates (estimated)

- 5 January 2026 to 25 March 2026
- 2 months, 21 days

Main procurement category

Services

CPV classifications

- 73111000 - Research laboratory services

Contract locations

- UK - United Kingdom

Participation

This procurement is reserved for

UK suppliers

Particular suitability

Small and medium-sized enterprises (SME)

Submission

Tender submission deadline

15 December 2025, 5:00pm

Submission address and any special instructions

To apply for this opportunity you must submit your quotation meeting the requirements detailed in the Request for Quotation (RFQ) attached.

Your response must be sent to matthew.j.shepherd@naturalengland.org.uk and victoria.sloan@naturalengland.org.uk by 5 pm on 15th December 2025.

If you have any clarification questions linked to this opportunity or the procurement process please submit these via email to the above email addresses. Please note that, unless commercially sensitive, both the question and the response will be circulated to all tenderers.

Tenders may be submitted electronically

No

Award criteria

Full details available in the RFQ.
