Scope

Description

Our Derbyshire Asset Performance and Field Team require a source of cohesive embankment fill to import into the works site from April 2026 for a 10-14week construction programme. We require an estimated 1,550m³ of fill material to raise and reshape our asset to improve its performance and make it climate resilient. We require a local source of material to reduce cost and carbon impacts. Deliveries also need to be closely coordinated with our Site Manager to control impact on the local community by managing the timing and numbers of daily deliveries to suit construction activity on site. Imports would be required within the months of April and May 2026.

The site is located at:

What3words -///propelled.advances.approach

Address - Wilne Ln, Derby DE72 2HF

Total value (estimated)

- £50,000 excluding VAT
- £60,000 including VAT
