### **Scope**

### **Reference**

### **Description**

The Authority HQ requires Chillers for Air Conditioning in order to allow functionality of the service especially the service rooms. There are four circuits and one needs a repair otherwise there is no possible functionality for the chillers to cool the building. It affects the server rooms and if these go down, it will affect HQ and the network to the whole service which is critical to the turnout of emergency communications when emergencies are called through.
