2025PRNOC-1012

Description

The NOC required the provision of six SBE 37-SMP-ODO MicroCAT sensors, each with titanium housing, integrated optical dissolved oxygen measurement, and optional pressure capability, for use in the Ellett Array and RAPID Array. These sensors were needed to ensure compatibility and technical integration with NOC's existing oceanographic monitoring systems. The goods included all necessary mounting hardware, cables, batteries, anti-foulant devices, and supporting software and documentation. Delivery was made to the National Oceanography Centre's bonded store. The sensors were only available through the appointed reseller due to the specific technical requirements and integration needs.
