Contract

Agentic AI Solution for ISCM

Ministry of Defence

UK7: Contract details notice - Procurement Act 2023 - [view information about notice types](#)

Notice identifier: 2025/S 000-083863

Procurement identifier (OCID): ocds-h6vhtk-05f7ed

Published 17 December 2025, 1:41pm

Scope

Description

The initial 15-month trial, commencing Nov 2025, will see the Agentic AI solution deployed within the RN's digital environment, leveraging Navy Digital and NDH(D) infrastructure. The trial will focus on a defined user group, with the system integrated into existing RN workflows and digital systems. The solution must be modular and designed for potential future integration with wider Defence digital capabilities, supporting the Navy's digital transformation agenda and the Maritime Digital Backbone. The objective is to ensure that, by the end of the trial, RN personnel are operationally competent and able to evaluate the system's suitability for potential future adoption, with self-sufficiency objectives only relevant if the system is retained post-trial. The solution must be compatible with Defence Digital standards, MODNET and NDH(D) architectures, and must retain MOD intellectual property, avoid vendor lock-in, and be open architecture and G-Cloud compliant. The trial will cover approximately 25–50 personnel, and will include onboarding (technical and users), user training, software and technical support, and compatibility with JIRA or provision of update pointers.

Contract 1

Supplier

- Frontera Holding Company Ltd

Contract value

- £111,734 excluding VAT
- £134,080 including VAT

Below the relevant threshold

Date signed

18 November 2025
