Description

This procurement relates to the straightforward supply and installation of fire safety signage, a low-complexity and low-value requirement with well-established specifications and market availability. As such, the contracting authority determined that preliminary market engagement was not necessary.

The scope, standards, and delivery expectations for fire safety signage are clearly defined and widely understood within the supplier market. No significant innovation, bespoke design, or supplier input was required to shape the procurement strategy or specification. Therefore, a PME Notice was not published prior to the Tender Notice.
