23 December 2025

V.2.2) Information about tenders

Number of tenders received: 1

Number of tenders received from SMEs: 1

Number of tenders received from tenderers from non-EU Member States: 1

The contract has been awarded to a group of economic operators: No

V.2.3) Name and address of the contractor

Birmingham Orthopaedic Oncology LLP

Cortlandt, George Street

Hailsham

BN27 1AE

Country

United Kingdom

NUTS code

- UKG3 - West Midlands

The contractor is an SME

Yes

V.2.4) Information on value of contract/lot (excluding VAT)

Initial estimated total value of the contract/lot: £200,000

Total value of the contract/lot: £200,000

Section VI. Complementary information

VI.3) Additional information

This is a Provider Selection Regime (PSR) intention to award notice. The awarding of this contract is subject to the Health Care Services (Provider Selection Regime) Regulations 2023. For the avoidance of doubt, the provisions of the Public Contracts Regulations 2015 do not apply to this award. The standstill period begins on the day after the publication of this notice. Representations by providers must be made to decision makers by 8th January 2026. This contract has not yet been formally awarded; this notice serves and as an intention to award under the PSR

Any written representation should be sent to matthew.kelsall@uhb.nhs.uk and paul.lee@uhb.nhs.uk

The award decision makers in respect of this award are: Steve Washbourne - Executive Chief Financial Officer and Marie Peplow - Chief Operating Officer.

Conflicts of Interest Declarations have been received and no conflicts have been identified in respect of the proposed award.

The Trust has awarded this contract using Direct Award Process C under the Provider Selection Regime (PSR) on the basis that the provider is already delivering this service to the required standard and remains the most appropriate organisation to continue doing so.

On this basis, the Trust has determined that:

the provider continues to be suitable and capable of delivering the service;

there is no evidence that an alternative provider would deliver better value, outcomes or performance; and

a competitive process would not be proportionate or in the best interests of patients or the Trust.

Accordingly, the Trust is satisfied that award through PSR Direct Award Process C is justified, compliant and in the best interests of service continuity, patient care, value and system stability.

The provider has demonstrated consistent high-quality clinical delivery, compliance with contractual requirements and strong engagement with the Trust's governance, quality and safety processes. They have established and effective working relationships with Trust clinicians and operational teams and are fully embedded within existing pathways,

ensuring safe, coordinated and efficient patient care.

Continuity of service is critical for patient outcomes, workforce stability and operational resilience. This provider offers a stable, experienced and clinically credible service model, with an appropriately skilled workforce, robust clinical governance arrangements and proven ability to meet activity, safety and performance requirements. Transitioning the service to an alternative provider would introduce unnecessary risk, potential disruption and avoidable cost without any evidence of improvement in quality or value.

The proposed contractual arrangements are affordable, represent value for money, and are aligned to the Trust's financial framework, activity requirements and strategic objectives. The provider has demonstrated capability to continue delivery safely, sustainably and in line with national standards, Trust policies and NHS contractual expectations.

In reaching the decision to award this contract, the Trust undertook a structured assessment of the key criteria and the basic selection criteria, in line with the requirements of the Provider Selection Regime (Direct Award Process C).

The Trust first confirmed that the provider continued to meet all basic eligibility requirements, including regulatory compliance, clinical governance arrangements, indemnity, safeguarding requirements, data protection obligations and adherence to Trust policies. This included assurance that the provider's workforce remained appropriately qualified, registered and competent to deliver the service safely.

The Trust then assessed the provider against the key PSR decision-making criteria, using a balanced and proportionate approach focused on:

Quality and clinical governance – performance against existing contractual quality requirements, evidence of safe delivery, participation in governance, learning from incidents and complaints, and alignment to national standards and Trust expectations.

Value – affordability, transparency of costs, alignment with Trust financial plans and evidence that the service continues to represent value for money over the contract term.

Integration, collaboration and sustainability – effectiveness of partnership working with Trust teams, alignment with Trust pathways and operational processes, and assurance around service resilience, business continuity and workforce sustainability.

Access and inequalities – ability to support timely access, equitable service delivery and compliance with Trust responsibilities relating to equality, inclusion and patient need.

Social value and alignment with NHS values – workforce wellbeing, ethical and responsible service delivery and contribution to wider NHS and Trust priorities where

relevant.

No artificial numerical weighting was applied, as the assessment was based on whether the provider continued to demonstrably meet required standards and offered the most appropriate solution for safe, stable and effective service delivery. However, quality, safety, continuity of care and service resilience were given greatest priority, reflecting the clinical nature of the service and associated risk if delivery failed or transferred unnecessarily.

Through this assessment, the Trust was satisfied that:

the provider continues to meet all basic selection criteria,

the provider continues to meet the PSR key decision-making criteria to a high and acceptable standard, and

no evidence exists to suggest that an alternative provider would deliver improved outcomes, better value or reduced risk.

On that basis, the Trust concluded that the provider remains the most appropriate organisation to deliver the service and that proceeding via Direct Award Process C was proportionate, justified and in the best interests of patients, quality, value and service continuity.
