Description

The Authority invites you to tender for a contract for the provision of the construction of a flow monitoring structure at the outfall of a historic culvert. This culvert drains the dressing floor of a former mine site.

The purpose of the structure is to enable accurate measurement of water flows entering a recently lined stream.

The construction of a flow gauging structure at Frongoch is necessary to measure the volume of water discharging from the culvert beneath the Frongoch dressing floor.

This will enable accurate quantification of heavy metal loading into the Frongoch stream, and subsequently into the Nant Cell and Afon Ystwyth.

Accurate flow measurement is essential for a comprehensive assessment of the need for

a mine water treatment scheme, and future design. Future flow monitoring, assessment or design does not form part of this contract.

The works associated with the Frongoch Culvert Flow Monitoring are inclusive of breaking into the existing below ground culvert, as shown on drawing FCFM-AEC-XX-XX-DR-C-0003, the installation of approximately 80m of pipework, a headwall with associated access steps and V-notch weir to allow for flow monitoring.

Contract 1. Culvert Flow Gauging Structure - Ceredigion

Supplier

- FIVE RIVERS ENVIRONMENTAL CONTRACTING LTD

Contract value

- £211,574.91 excluding VAT
- £253,889.89 including VAT

Below the relevant threshold

Award decision date

22 December 2025

Earliest date the contract will be signed

14 January 2026

Contract dates (estimated)

- 19 January 2026 to 30 April 2026
- Possible extension to 30 September 2026
- 8 months, 13 days

Description of possible extension:

Contract date contingent upon external factors and may also be subject to delays on site once work has commenced
