

Clarification Ref	Question Raised	Council Response	Impact on Tender
CA1	Does the Council view the Bourton Park bank reinstatement as a standalone project, or is it part of a wider programme of works (e.g., river corridor enhancements, flood mitigation etc)?	This is standalone project.	No
CA2	Are there any additional drivers behind this project beyond structural stability and limiting crayfish burrowing? For example, is there a target for habitat creation or specific species protection that we should account for in our methodology?	There are no additional drivers for this project beyond what is specified in the tender documentation. There are no specific targets for habitat creation or species protection that need to be factored into the methodology beyond any standard environmental requirements.	No
CA3	In the interest of delivering maximum benefits for biodiversity, is the Council open to proposals that include optional enhancements to the adjacent riparian habitats, or is the scope strictly limited to that outlined in the tender documents?	The scope is limited to what is set out in the tender documents. Tenderers should base their submissions only on the services and requirements described in the Invitation to Tender and related documents, and should not include any additional services or assumptions unless they are specifically requested.	No
