SCHEDULE 1

Ordering Procedure

1.0 Mini Competition Procedure

1.1 Initiation:

When the Council wishes to purchase Works, they will initiate a mini competition as outlined below:

1.2 Opportunities:

The Council will advertise opportunities in advance via a pipeline of projects. This pipeline will be updated as projects are approved or cancelled, including amendments to proposed tender and start completion dates required for operational or governance reasons.

1.3 Lot Selection:

The Council will determine the most appropriate Lot for the mini competition. They may choose to open the mini competition to more than one Lot at their discretion.

1.4 Expression of Interest:

All Suppliers on the selected Lot(s) will receive a request to provide an "Expression of Interest", as Appendix A, via the Chest. Suppliers with Key Performance Indicator (KPI) scores below the target minimum will be excluded from requests to express interest, in accordance with Schedule 5 of the framework agreement.

1.5 Contractor Response:

Contractors must respond within the minimum time period specified in the request (not less than 2 working days) to confirm their interest. Responses must be submitted via the Chest by midnight unless otherwise stated. Late responses will not be considered.

1.6 Tender List:

The Council will assess the expressions of interest and establish a mini-competition tender list. If there are up to 6 interested suppliers, all will be invited to participate. If there are more than 6, the Framework User will request a high-level method statement and quality plan from all interested suppliers, to be returned within a specified period (not less than 3 working days). The top 4 scoring suppliers will be shortlisted. Contractors not selected for the mini competition will be informed via the Chest, within 5 working days.

1.7 Tender Documents:

Selected contractors will receive the mini-competition tender documents, including assessment criteria, Call-Off terms and conditions, work package drawings, schedules, and specifications. The return period for tenders will be

determined by the Framework User, considering the complexity and urgency of the works, generally between three and six weeks.

1.8 Assessment:

Returned mini competition tender documents will be assessed based on the criteria set out in the tender documents. The assessment will consider Social Value, Price, and Quality, with weightings varying from 100% Price: 0% Social Value and Quality to 0% Price: 100% Social Value and Quality. Quality criteria may include methodology, programme, resources, innovation, sustainability, and social or environmental impacts.

1.9 Selection:

All contractors who tendered will be informed of the mini-competition outcomes. The selected contractor will complete the Call-Off terms and conditions. The Council, as the Framework User, is not obliged to place any Order or enter into any contract following a mini competition. However, if the Council does place an Order, the contractor shall enter into a form of contract comprising the documents in Schedule 2, as amended, and any other documents issued as part of the mini-competition invitation.

1.10 Performance Based Adjustments:

Contractors with an average quarterly KPI score exceeding the Upper Band level will have their price score adjusted for all mini competitions in the following quarter, in line with Schedule 5 of the framework agreement.

1.11 Contractor Capacity:

The Council acknowledges that a Contractor's capacity to undertake work may vary, and thus, allows Contractors to withdraw or opt out from tender opportunities as necessary. This flexibility enables the Council to monitor trends and enhance the framework progressively.

KEY PERFORMANCE INDICATORS (KPI's)

5.0 Performance Monitoring

- 5.1 The following performance management process applies to all projects awarded to a Contractor under the Framework Agreement. The purpose of these evaluations is to maintain high standards and incentivise excellence.
- 5.2 Performance monitoring will be conducted electronically and measured through a suite of Key Performance Indicators (KPIs) as outlined in **Appendix A**.
- 5.3 Each project will be evaluated quarterly. Contractors must ensure that KPI scores are agreed upon and reported within four weeks of the end of each quarter. Failure to submit an agreed KPI score by the end of week six will result in the Contractor being immediately excluded from all mini competitions until the KPI is agreed upon by both the Contractor and the Project Manager, as illustrated in the diagram below.

- 5.4 If a Contractor has multiple scores across a Lot in a given quarter, these will be combined into a single average score for the subsequent quarter.
- 5.5 Contractor overall project performance will be assessed against the table below:

Score	Defintion	Action
86 - 100	Upper Band - High performance	The Contractor will receive a 5% deduction from their tender prices for assessment purposes in all mini competitions issued in the subsequent performance quarter.
66 - 85	Minimum Band - Satisfactory performance	No action required.
0 - 65	Lower Band - Low performance	If a project or Contractor average KPI score falls below the target minimum, or if the contractor scores zero for any individual indicator, the Contractor will be excluded from future mini-competitions. The exclusion will remain until agreed remedial actions have been implemented to address the reasons for poor performance, as approved by the Framework Manager.

- 5.6 If a Contractor's KPI scores fall below the target band minimum on two or more different projects within two rolling periods, the Council may terminate the Framework Agreement.
- 5.7 The Council reserves the right to amend the KPI scoring guidance definitions and the levels of the Upper and Minimum target bands at any time.

SCHEDULE 6

SCOPE

6.0 Overview

- 6.1 To undertake construction projects across various locations within Cumberland, with an individual project budget of up to £6,000,000. The Council reserves the right to advertise projects exceeding this value if it considers it appropriate.

Exceptions: General building projects with a budget below £200,000 will not be included in this framework. Instead, these smaller projects will be managed through a separate Minor Works framework that is already in place.

- 6.2 The projects are divided into the following work packages (Lots):

- **Lot 1:** General Building Works
- **Lot 2:** Civil Engineering Works
- **Lot 3:** Combined General Building and Civil Engineering Works

Projects will be a mix of traditional and design & build, depending on the individual project complexities. Traditional projects typically follow a linear sequence of design, bid, and build, which can be more straightforward but may take longer. Design & build projects, on the other hand, integrate design and construction phases, potentially speeding up the process and allowing for more flexibility and innovation. This mix ensures that we can tailor our approach to the specific needs and challenges of each project.

- 6.3 The framework will span 4 years, from Winter 2026 to Winter 2030.
- 6.4 Contractors will be appointed as the principal contractor (BSA & CDM) for each project.
- 6.5 Contractors must ensure they have the necessary capabilities to perform the tasks described in each work package summary for the respective lots.
- 6.6 Please see Appendix F of the ITT. All bidders submitting a tender must indicate on the table in this schedule which Lots they wish to be considered for. Please note, there is no guarantee as to which or how many Lots you will be appointed to.
- 6.7 Cumberland use a Professional Services Framework for Consultancy/Design Services. Therefore, the appointed contractor will be expected to work with the relevant consultant to deliver traditional projects. For design & build projects, the contractor can use their own consultants.

6.8 Lot Information

- 6.9 Contractors are expected to demonstrate that they have the capability and resources to manage and deliver a diverse range of projects across the Council's entire asset portfolio, maintaining the highest standards of safety and quality. This includes providing all necessary labour, materials, and expertise to execute various work packages. Additionally, contractors should exhibit flexibility and adaptability to meet the unique requirements of each project. A list of previous historic project examples is included in **Appendix A**.

6.10 Lot 1: General Building Works

- Project Value Range: £0.2 million to £3 million
- Estimated Annual Projects: 15 to 20
- Average Project Value: £0.9 million

Contractors are expected to undertake a variety of works including:

- Planned Maintenance: This may involve repairs and replacements of roofs, windows, and mechanical and electrical systems (M&E). Capital maintenance projects are typically low value and primarily focused on ensuring buildings are safe, windproof, and watertight.
- Upgrading and Refurbishment: This includes the enhancement and renovation of the Council's existing portfolio of corporate and school properties.
- New Builds and Extensions: This involves constructing new buildings and extending existing corporate and school properties, utilising a wide range of building types, including modular and offsite fabrication.

6.11 Lot 2: Civil Engineering Works,

- Project Value Range: Up to £3 million
- Estimated Annual Projects: 15 to 20
- Average Project Value: £1 million

Contractors are expected to undertake a variety of works including:

- Structures & Bridges: This involves the repair and maintenance of highway structures, including retaining walls and bridges. Tasks may include culvert replacement, masonry arch bridge repairs, replacement of sections of retaining walls, and sea wall repairs. These structures are primarily made of stone or stone-faced materials, reinforced or mass concrete, or structural steelwork, and are most often located on carriageway local roads.

- Public Realm: This includes improvements to town centre environments, likely involving highway surfacing, footpaths, drainage, and signage enhancements.
- Highway Improvements: This involves improvements to junctions, access roads, car parks, and distributor routes to enhance safety and facilitate development.
- Footpath/Cycleway Improvements: This includes improvements to or the construction of new cycle and pedestrian infrastructure to improve links between existing infrastructure to ensure compliance with new design standards.
- Drainage, Ground Stabilisation, and Flood Prevention Schemes: These schemes could include packages of several small drainage projects, piling, slope stabilisation, or slope protection schemes adjacent to highways. They may also encompass a variety of flood prevention initiatives.

6.12 Lot 3: Combined Building and Civil Engineering Works,

- Project Value Range: £2.5 million to £6 million but may be used to procure schemes above £6m (with no upper limit) based on complexity, risk and other considerations
- Estimated Annual Projects: 2 to 5
- Average Project Value: £4.5 million

Contractors are expected to undertake a variety of works including:

- Similar projects to those outlined in Lots 1 and 2.
