Summary

This project supports the continued provision of a chemical and biological measurement system for the UK through a developed metrological infrastructure, and calibration and measurement capabilities (CMCs) needed to fulfil UK obligations under the International Committee for Weights and Measures Mutual Recognition Arrangement (CIPM MRA), such that calibration services are provided to UK organisations. This ensures confidence in the accuracy and reliability of the results of measurements performed by UK organisations to underpin their trade both nationally and globally.

Project Title	High quality chemical and bio-measurement standards for UK stakeholders and harmonisation and mutual recognition of UK measurement standards within the international metrology infrastructure	Co-funding target	n/a
		Start Date	01 April 2025
Project Lead	████████████████████ ████████████████████ ██████████████████ ██████████████████ ██████████████████ ██████████████████ ████████	End Date	31 March 2026
Theme	Core Metrology	Sub-Theme	Metrological Outputs
Project Team	All Teams	Measurement Readiness Level	n/a

Summary

This project supports NML representation on key National, European and International metrology organisations, to maintain and develop the infrastructure and competencies required to fulfil UK obligations under the International Committee for Weights and Measures (CIPM) Mutual Recognition Arrangement (MRA), such that the National Measurement System (NMS) is recognised globally for chemical and biological measurements.

The project also supports collaboration with other countries to develop documentary standards and best practice/guidance concerned with improving the quality and comparability of chemical and biological measurements.

Theme	Core Metrology	Sub-Theme	Metrological Outputs
Project Team	Office of Reference Materials	Measurement Readiness Level	7 - application in established areas

Summary

This project will produce new reference materials to support method validation in challenging and emerging areas of analysis driven by upcoming regulations and the need to underpin clinical diagnosis as well as safety and sustainability. In addition, the project will support the National Measurement Laboratory (NML) Office of Reference Material activities as a provider of internationally recognised, high quality, reliable reference materials across multiple analytical sectors.

Project Number	MO4	Price to DSIT	████████
Project Title	Knowledge and Skills Exchange	Co-funding target	n/a
		Start Date	01 April 2025
Project Lead	████████	End Date	31 March 2026
Theme	Core Metrology	Sub-Theme	Metrological Outputs
Project Team	Knowledge & Skills Exchange	Measurement Readiness Level	8 - application in established areas

Summary

The project aims to equip scientists who generate and use measurement data with the essential knowledge of metrology and quality assurance to help underpin the reliability and reproducibility of the data they produce, at all stages of their careers. The project will identify the skills gaps associated with core metrology and laboratory quality assurance and develop training resources to address these gaps. The project will review existing resources, updating content and delivery format where required to ensure that material addresses current regulatory and accreditation requirements across sectors and is accessible in a number of formats. This will include continued development of app-based microlearning and a review of other online development and hosting options to maximise accessibility of training resources. New resources will be developed with a focus on core metrology, and training content will be expanded to meet the needs of laboratories carrying out qualitative tests as well as those carrying out quantitative analysis.

Project Number	MO5	Price to DSIT	
Project Title	Improved statistical methods for metrology	Co-funding target	n/a
		Start Date	01 April 2025
Project Lead		End Date	31 March 2026
Theme	Core Metrology	Sub-Theme	Metrological Outputs
Project Team	Science & Partnerships	Measurement Readiness Level	5 - application in emerging areas

Summary

This project will develop improved statistical procedures for treatment of interlaboratory study data with correlations, for advanced reference material (RM) data analysis, and for high accuracy measurements for calibration and RM certification. The project will support work on other projects on protein quantification and characterisation using machine learning and lead to more reliable values and uncertainties and more efficient high accuracy measurement. Outputs will also contribute to future standards for RM production.

Sub-theme 1.2: Core Capabilities

Project Number	CM1	Price to DSIT	
Project Title	Maintenance of calibration and measurement capabilities for accredited services	Co-funding target	n/a
		Start Date	01 April 2025
Project Lead		End Date	31 March 2026
Theme	Core Metrology	Sub-Theme	Core Capabilities
Project Team	Purity & Calibration	Measurement Readiness Level	7 - application in established areas

Summary

This project will maintain the calibration and measurement capabilities within the Purity & Calibration Team that underpin ten UKAS accredited (ISO/IEC 17025) methods used for purity assignments. Additionally, the project will develop improved workflows and measurement strategies to maintain and progress high accuracy purity assignments.
