

UoS/DH/24/25/QTR1/ Leadership programme for senior leaders

Leadership programme for senior leaders at University of Salford.

The University of Salford requires a tailored leadership programme to be delivered to a cohort of senior researchers and research leads. The programme is intended to span a five-month period and should incorporate workshops, individual coaching, action learning sets and institution-specific bespoke sessions.

The programme should be grounded in evidence-based practice and aligned with the strategic priorities of the institution. It should aim to enhance leadership capacity, foster collaborative and reflective practice, and support the professional growth of senior academic staff.

Interested providers are requested to submit a detailed quotation outlining their proposed methodology, relevant experience, and associated costs.
