Key

Fixing detail of linings

- Fabric to be carefully removed or altered
- New fabric by others - refer to Jamie Fobert Architects' design information

- Modern fittings carefully removed. Finishes and drained cavity waterproofing membrane carefully stripped back to reveal bare brickwork.
- Previous fixings to be made good, generally in mortar to match existing. Subject to mortar analysis during strip-out.
  - Holes drilled into historic fabric to architect's specification with non-percussive diamond tipped drill and fixings to architect's specification. Existing fixing points to be reused if possible.

Stud wall to Jamie Fobert Architects' design according to fire, acoustic and structural performance but comprising:

- Plastic shims between brickwork surface and metal studwork
- Metal studs fixed at 1.2m vertical centres into single bricks. Pre-existing fixing points to be reused where possible.
- One or two layers of plasterboard depending on requirements.
- Beaded profiles to achieve 10mm shadow gap at termination against historic fabric

NB  
To be read in conjunction with Jamie Fobert Architects' information

NB  
All areas and methodologies given for conservation and repairs are subject to full condition survey following strip-out.

**Notes:**

Drawings are based on survey data and may not accurately represent what is physically present.

Do not scale from this drawing. All dimensions are to be verified on site before proceeding with the work.

All dimensions are in millimetres unless noted otherwise.

Purcell shall be notified in writing of any discrepancies.
