# 3.0 Accommodation Analysis

#### 3.2 Proposed Accommodation Schedule Analysis

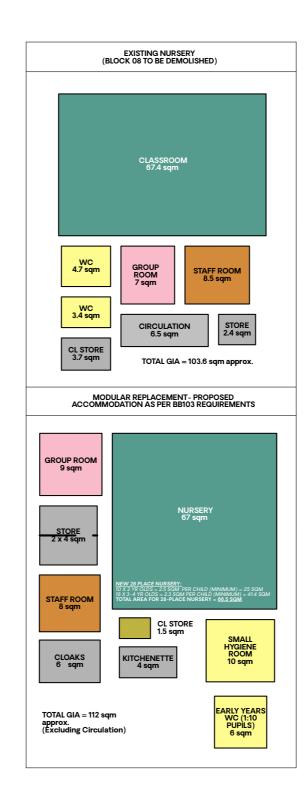

An exercise was conducted to compare the current accommodation schedule to the Building Bulletin 103. This indicates that the school floor area and accommodation is generally in accordance with BB103, with the exception of the hall, which is circa 30sqm smaller than the recommendation. In addition to the modular replacement, it is proposed for the school to have:

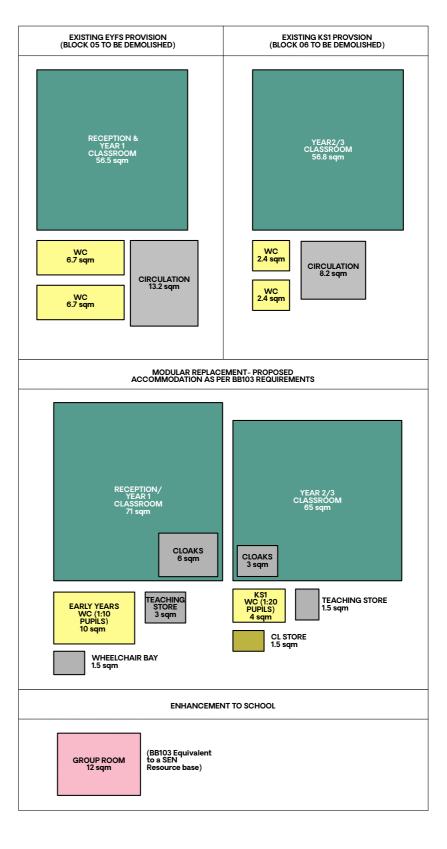

- A small hygiene room
- A 12sqm group room

#### 3.3 External Play

With reference from BB103, an external play area calculation was conducted to ensure that, despite the proposed extension, there is enough external play for the whole school.

The school extension will be directly adjacent to the year 5/6 classroom. Reception/ Year 1 and Year 2/3 will be in closer proximity to the main school building due to existing adjacencies. The nursery provision will be accessed from the existing gate that has direct access onto the public footpath. This enables the nursery to be independent of the school routine, especially with mid day drop offs.

Whilst no additional parking spaces are required as this is not be.

Whilst no additional parking spaces are required as this is not a school expansion, 6 additional bays have been included. These can be accommodated on site without impacting play space.

Planning Application - PL/2024/03115

A planning application has been submitted March 2024 in regards to land adjacent of Hullavington School. This application consists of 71 residential units including a community car park and land reserved for a school extension, as per the Hullavington Town Plan 2016-2026 set in.

The reserved land measures approximately 2000sqm.

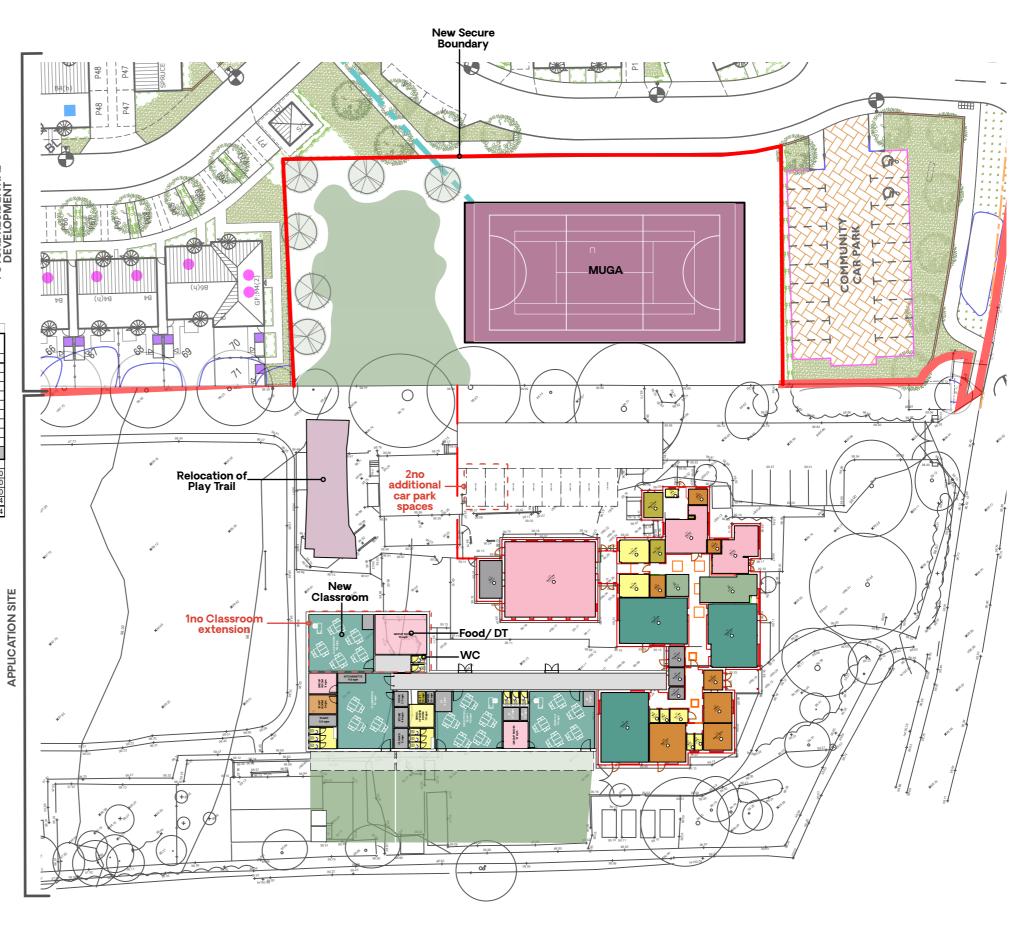

#### Future Development Plan Option 1

The school development plan will include the addition of an extra teaching classroom and an extra room for specialised learning (e.g. Food technology/ Design & Technology) as per the BB103 recommendation, Due to an increase in staff, an additional 2no car parking spaces will be provided within the school site, with a new total

parking spaces will be provided within the school site, with a new total of 14no car parking spaces.

The land reserved for Hullavington school measures to 2000sqm; one half is to be used as an external play extension for the school, due to the land lost for the 1no classroom extension. The new school boundary will follow onto the end of the parcel of land to highlight new ownership. The other half could be hardplay or a multi-use games area (MUGA) that could include community use (MUGA) that could include community use.

#### Future Development Plan Option 2

The school development will include the conversion of the nursery classroom to a primary school classroom. The parcel of land reserved for the school will be used as the new site for the nursery as per BB103 requirements. With close proximity to the community car park, there can be easy access for parents for midday pick up and drop off. The other half could be hardplay or a multi-use games area (MUGA) that could include community use.

New Secure Boundary New extension-within 10 years **MUGA** wc  $\bigcirc$ 2no additional Relocation of Play Trail car park

# 5.0 Project Phasing Plan

#### PHASE 1

- New extension of school to be built on existing hard play area.

#### PHASE 2

- Decant Nursery, Reception, year 1, 2 and 3 into new school extension.

#### PHASE 3

- Demolition of existing modular buildings.

#### PHASE 4

- 6no new car parking provision to be built east of the hall
- New secure boundary to be re-established north of the car parking
- New hard/soft external play areas to be landscaped west of the school extension with a new secure boundary.

#### 6.0 Conclusion

#### 6.1 Conclusion

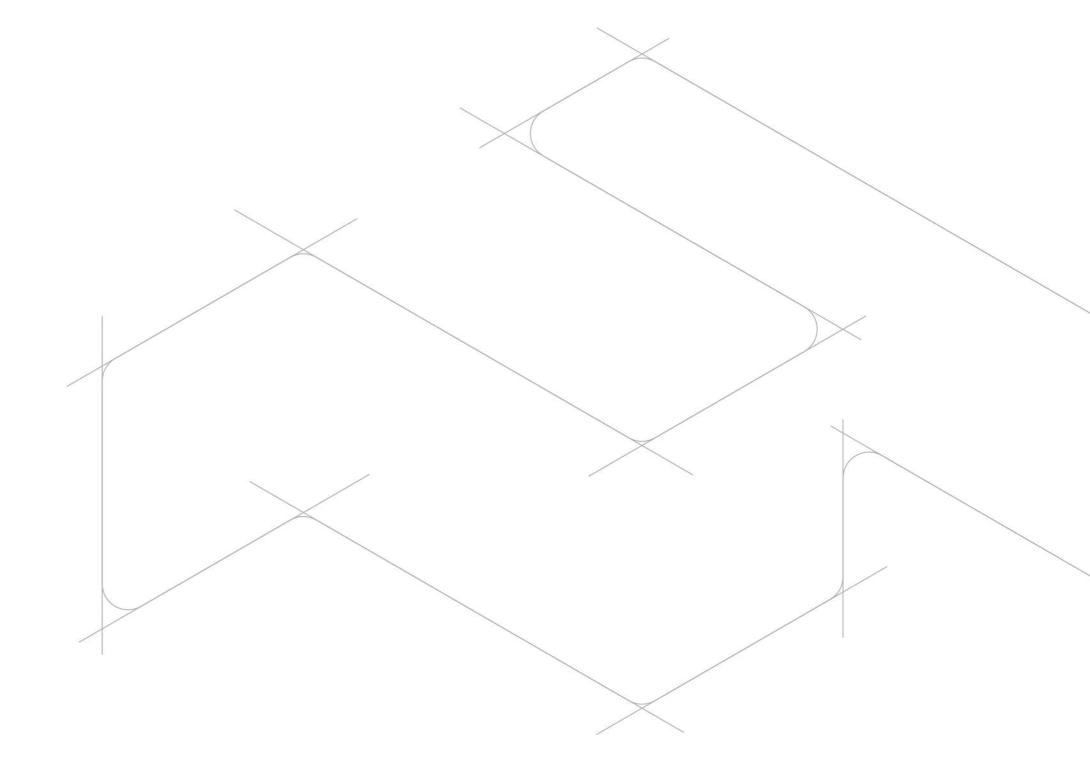

The feasibility study tested Hullavington Primary School capacity to demolish existing inadequate modular units with better quality teaching spaces.

The preferred option shows the two replacement classrooms and a nursery as an extension to the existing school building. It indicates all classrooms having direct access to external play area and to group rooms. A small hygiene room has been included in the scheme that is accessible to all areas of the school. 6 additional car park spaces have been provided to supplement the existing shortfall in spaces.

#### **Assumptions & Limitations**

This feasibility study has been conducted based on the following assumptions and limitations. These will form part of the Project Risk Register, which will be developed at the next stage.

- A consultation with Building Control has not been carried out at the feasibility stage. This includes environment calculations or performance and aspirations related to sustainability. No building condition surveys have been completed. No structural or M+E assessment has been completed as a part of this study including services capacity. No assessment of existing fire compartmentalisation, asbestos or services survey have been completed or informed the study. The security and fencing has not been reviewed with regard to the secure boundary with the new development

# **WO2151 - Replacement Temporary Classrooms Project**

#### 1.0 Project Brief

#### 1.1 **Project:**

Replacement of temporary classrooms at three primary schools in Wiltshire.

#### 1.2 **Locations:**

The locations of each of the three primary schools are:

School 1: Frogwell Primary School, Derriads Lane, Chippenham,

Wiltshire, SN14 0DG

School 2: Hullavington Primary School, The Street, Hullavington,

Chippenham, Wiltshire, SN14 6EF

School 3: Minety Primary School, 2 Sawyers Hill, Minety, Malmesbury,

Wiltshire, SN16 9QL

#### 1.3 **Project Description:**

#### 1.3.1 Frogwell Primary School:

Frogwell Primary School was originally a 2FE Primary School and also has a separate Children's Centre which is now vacant. The school has a nursery provision in an existing mobile building that is also vacant. The school is currently operating as a 1FE school with circa 199 pupils on role education pupils from age 5 to 11. It also has a dedicated SEND Resource Base in one of the other temporary classroom buildings that accommodates 25 pupils two thirds of whom are within KS2.

The requirement is to reconfigure existing under-used accommodation within the main school building to enable the temporary classrooms to be demolished.

A feasibility study has been undertaken for Wiltshire Council by Footprint Architects which concludes that the school has sufficient spare capacity and that a new build development is not required. A copy of the feasibility study is included with this project brief for information at Appendix 1

#### 1.3.2 **Hullavington Primary School:**

Hullavington Primary School is a 150-place school catering for pupils with an age range from 2-11. It has between 21-27 pupils per combined year groups across the 5 classrooms and a 21-place nursery. Three classrooms are in the main school building and two are in temporary buildings. The nursery is in an independent mobile building with access

direct from a public footpath.

The site adjacent to the school is being developed for housing and as part of the development there are 2 parcels of land that are being made available. One will form a community car park outside of the school usage and the other will be transferred to the school should it be required for expansion within the next 10 years.

The requirement is to construct a new, three classroom block, capable of further expansion in the future by one classroom, and the demolition of the existing temporary classroom buildings.

A feasibility study has been undertaken for Wiltshire Council by Footprint Architects and a copy of the feasibility study is included with this project brief for information at Appendix 2.

#### 1.3.3 **Minety Primary School:**

Minety Primary School is a 150-place primary school catering for pupils with an age range from 5 to 11. It has between 21-27 pupils per combined year groups across the circa 5 classrooms.

The requirement is to replace a dilapidated two classroom temporary building with a new two classroom block.

No feasibility study has been undertaken and to date there has been no formal engagement with the school about the project, however it's understood that there is an available site for the new build development on a piece of land adjacent to the school hall. On appointment, an introductory meeting will be arranged to understand more about the requirement and to develop initial proposals to take the project further.

#### 1.4 Estimated Project Value:

1.4.1 The council has a total estimated Construction Cost of £5,700,000.00 inclusive of VAT.

The council's forecast construction costs for each of the projects inclusive of VAT are as follows:

Frogwell Primary School £2.0m + VAT = £2.4mHullavington Primary School £2.0m + VAT = £2.4mMinety Primary School £0.75m + VAT = £0.9m

-----

Total Estimated Construction Cost incl VAT £5.7m

The fees for the Stage 1 (pre-construction) appointment should be based on this amount (see Annex 2 Financial workbook which is to be completed and submitted as part of the tender response in the ITT Stage 2 of this procurement.

#### 1.5 **Contract:**

- 1.5.1 The initial form of appointment for the successful Contractor will be a Pre-Construction Services Agreement (PCSA) and a copy of the draft PCSA is included with these tender documents for information.
